Mostly positive signals in the chart today. The **The Ensign Group** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$122.54** and **\$120.15**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, May 06, 2024**, and so far it has risen 8.51%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

The Ensign Group finds support from accumulated volume at \$123.69 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
