Tech commentaries:

The **Legal & General Ucits Etf Plc - L&g** ETF price gained **1.24%** on the last trading day (Friday, 28th Jun 2024), rising from **12.90€** to **13.06€**. During the last trading day the ETF fluctuated **1.19%** from a day low at **12.94€** to a day high of **13.10€**. The price has risen in 6 of the last 10 days and is up by **1.89%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **2 thousand** more shares were traded than the day before. In total, **9 thousand** shares were bought and sold for approximately **123.80€** thousand.

The ETF has broken the horizontal trend up. Breaks like this are often followed by swift and strong movements, and any correction down to the breakline at approximately **13.04€** is considered to be a "second chance" to hit a potential runner. It is, however, important that volume does follow the price as false breaks may appear and it may move back into the horizontal trend. Based on the rectangle-formation theory the ETF is predicted to reach **13.68€** sometime during the next 3 months.

The **Legal & General Ucits Etf Plc - L&g** ETF holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **12.83€** and **12.82€**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Friday, June 21, 2024**, and so far it has risen 3.44%. Further rise is indicated until a new top pivot has been found. **Legal & General Ucits Etf Plc - L&g** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

Legal & General Ucits Etf Plc - L&g finds support from accumulated volume at **12.98€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **13.07€**, **13.10€** and **13.24€**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **0.154€** between high and low, or **1.19%**. For the last week the ETF has had daily average volatility of **0.662%**.

Legal & General Ucits Etf Plc - L&g holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
