The price has risen in 6 of the last 10 days and is up by **0.14%** over the past 2 weeks. The ETFs at the upper part of a narrow and horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **99.80€** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **Ishares € Govt Bond 0-1yr Ucits Etf** with a 90% probability to be traded between **100.64€** and **100.69€** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and ETFs seldom manage to go directly from the bottom of a trend up to the top. ETFs turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Mostly positive signals in the chart today. The **Ishares € Govt Bond 0-1yr Ucits Etf** ETF holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **99.74€** and **99.52€**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, June 05, 2024**, and so far it has risen **0.285%**. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Ishares € Govt Bond 0-1yr Ucits Etf** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

**Ishares € Govt Bond 0-1yr Ucits Etf** finds support from accumulated volume at **99.24€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the ETF may perform very well during the next couple of days.
