There are few to no technical positive signals at the moment. A sell signal was issued from a pivot top point on **Tuesday, June 25, 2024**, and so far it has fallen **-1.21%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

First Seacoast Bancorp finds support from accumulated volume at \$8.92 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$9.05**, **\$9.14** and **\$9.16**.
