The stock lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **First United Corporation** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, March 28, 2024**, and so far it has fallen -1.22%. Further fall is indicated until a new bottom pivot has been found.

First United Corporation finds support from accumulated volume at \$22.20 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$22.64**, **\$22.70** and **\$22.85**.
