The price has fallen in 7 of the last 10 days and is down by **-3.03%** for this period. Volume has increased on the last day by **221 thousand** shares but on falling prices. The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

A buy signal was issued from a pivot bottom point on **Tuesday, March 26, 2024**, and so far it has risen 2.80%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**Gujarat Ambuja Exports Limited** finds support from accumulated volume at **₹158.20** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
