## Tech commentaries:

The **WisdomTree Enhanced Commodity Strategy** ETF price gained **0.98%** on the last trading day (Friday, 17th May 2024), rising from **\$19.31** to **\$19.50**. It has now gained 3 days in a row. It will be exciting to see whether it manages to continue gaining or take a minor break for the next few days. During the last trading day the ETF fluctuated **1.45%** from a day low at **\$19.27** to a day high of **\$19.55**. The price has risen in 7 of the last 10 days and is up by **3.34%** over the past 2 weeks. Volume fell on the last day by **-8 thousand** shares and in total, **11 thousand** shares were bought and sold for approximately **\$211.24** thousand. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The ETF lies in the middle of a strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the ETF is expected to rise **12.60%** during the next 3 months and, with a 90% probability hold a price between **\$21.48** and **\$22.61** at the end of this 3-month period.

There are mixed signals in the ETF today. A sell signal was issued from a pivot top point on **Thursday, April 25, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may also not. The **WisdomTree Enhanced Commodity Strategy** ETF holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$19.18** and **\$19.15**. A breakdown below any of these levels will issue sell signals.

**WisdomTree Enhanced Commodity Strategy** finds support from accumulated volume at \$19.31 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the ETF may perform very well during the next couple of days.

In general the ETF tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the ETF. During the last day, the ETF moved **\$0.280** between high and low, or **1.45%**. For the last week the ETF has had daily average volatility of **1.24%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **WisdomTree Enhanced Commodity Strategy** ETF to perform well in the short-term.

Risk: **Low**

Evaluation: **Buy Candidate**
