## Tech commentaries:

No changes to the price of **Goldman Sachs Group Securities STRATS** stock on the last trading day (Thursday, 25th Apr 2024). During the last trading day the stock fluctuated **0%** from a day low at **\$22.70** to a day high of **\$22.70**. The price has fallen in 4 of the last 10 days and is down by **-1.51%** for this period.

The stock lies in the middle of a narrow and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **4.13%** during the next 3 months and, with a 90% probability hold a price between **\$23.40** and **\$24.32** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Tuesday, April 23, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Goldman Sachs Group Securities STRATS** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$22.85** and **\$22.74**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

**Goldman Sachs Group Securities STRATS** finds support from accumulated volume at \$22.50 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$22.80**, **\$22.89** and **\$23.05**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **0.434%**

**Goldman Sachs Group Securities STRATS** holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
