The price has risen in 6 of the last 10 days and is up by **10.81%** over the past 2 weeks. Volume fell on the last day by - **117 thousand** shares and in total, **632 thousand** shares were bought and sold for approximately **\$518.62 thousand**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **54.06%** during the next 3 months and, with a 90% probability hold a price between **\$0.96** and **\$1.38** at the end of this 3-month period.

There are mixed signals in the stock today. A sell signal was issued from a pivot top point on **Tuesday, April 30, 2024**, and so far it has fallen **-1.20%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may also not. The **Grown Rogue International Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$0.749** and **\$0.674**. A breakdown below any of these levels will issue sell signals.

Grown Rogue International Inc. finds support from accumulated volume at **\$0.80** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$0.83**.

This stock may move much during the day (volatility) and with periodic low trading volume this stock is considered to be "high risk". During the last day, the stock moved **\$0.0850** between high and low, or **11.56%**. For the last week the stock has had daily average volatility of **10.24%**.

Grown Rogue International Inc. holds several positive signals and is within a strong rising trend. As the old saying says, "Let the trend be your friend." We therefore consider it to be a good choice at these current levels and we are expecting further gains during the next 3 months.

Risk: **High**

Evaluation: **Strong Buy Candidate**
