The price has risen in 6 of the last 10 days and is up by **7.58%** over the past 2 weeks. The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-15.49%** during the next 3 months and, with a 90% probability hold a price between **26.05€** and **31.42€** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

There are mixed signals in the stock today. The **Hensoldt AG** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **34.43€** and **36.38€**. A break-up above any of these levels will issue buy signals. A buy signal was issued from a pivot bottom point on **Friday, June 14, 2024**, and so far it has risen 7.58%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal.

Hensoldt AG finds support from accumulated volume at **34.14€** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **37.70€**, **38.54€** and **40.78€**.

Hensoldt AG holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock.
