The cryptocurrency lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to rise **10.12%** during the next 3 months and, with a 90% probability hold a price between **\$0.00003377** and **\$0.00004420** at the end of this 3-month period.

The **Herbalist Token USD** cryptocurrency holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the longterm average is above the short-term average there is a general sell signal in the cryptocurrency giving a more negative forecast for the stock. On a fall, the cryptocurrency will find some support from the short-term average at **\$0.00003486**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Sunday, June 23, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the cryptocurrency finds support just below today's level from accumulated volume at **\$0.000032** and **\$0.000031**. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.000036**, **\$0.000037** and **\$0.000038**.
