MACD: Sell

Tech commentaries:

The **Hub Group** stock price fell by **-0.327%** on the last day (Tuesday, 2nd Jul 2024) from **\$42.86** to **\$42.72**. During the last trading day the stock fluctuated **1.36%** from a day low at **\$42.57** to a day high of **\$43.15**. The price has fallen in 6 of the last 10 days but is still up by **0.28%** over the past 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-29 thousand** shares and in total, **343 thousand** shares were bought and sold for approximately **\$14.66 million**.

The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **6.07%** during the next 3 months and, with a 90% probability hold a price between **\$43.36** and **\$48.13** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Hub Group** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$43.04** and **\$43.00**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, May 09, 2024**, and so far it has fallen **-2.62%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Hub Group finds support from accumulated volume at **\$42.57** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$43.03**, **\$43.05** and **\$43.21**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **\$0.580** between high and low, or **1.36%**. For the last week the stock has had daily average volatility of **1.87%**.

Hub Group holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
