Tech commentaries:

The **WisdomTree Alternative Income Fund** ETF price gained **1.41%** on the last trading day (Wednesday, 1st May 2024), rising from **\$18.08** to **\$18.33**. During the last trading day the ETF fluctuated **2.18%** from a day low at **\$18.09** to a day high of **\$18.49**. The price has risen in 7 of the last 10 days and is up by **2.89%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **405** more shares were traded than the day before. In total, **3** thousand shares were bought and sold for approximately **\$57.70** thousand.

The ETF is at the upper part of a narrow and horizontal trend and normally this may pose a good selling opportunity but a break-up through the top trend line at **\$18.42** will give a strong buy signal and a trend shift could be expected. Given the current horizontal trend, you can expect **WisdomTree Alternative Income Fund** ETF with a 90% probability to be traded between **\$17.64** and **\$18.32** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and ETFs seldom manage to go directly from the bottom of a trend up to the top. ETFs turning up in the middle of a horizontal trend are therefore considered to be potential runners. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **WisdomTree Alternative Income Fund** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **WisdomTree Alternative Income Fund** ETF holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the long-term average is above the short-term average there is a general sell signal in the ETF giving a more negative forecast for the stock. On further gains, the ETF will meet resistance from the long-term Moving Average at **\$18.34**. On a fall, the ETF will find some support from the short-term average at **\$18.23**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. A sell signal was issued from a pivot top point on **Tuesday, April 23, 2024**, and so far it has fallen **-0.490%**. Further fall is indicated until a new bottom pivot has been found.

WisdomTree Alternative Income Fund finds support from accumulated volume at **\$18.29** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$18.43**, **\$18.44** and **\$18.53**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.395** between high and low, or **2.18%**. For the last week the ETF has had daily average volatility of **0.81%**.

WisdomTree Alternative Income Fund holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this ETF. We have upgraded our analysis conclusion for
