## Tech commentaries:

No changes to the price of **Inspira Technologies Oxy B.H.N. Ltd.** stock on the last trading day (Tuesday, 16th Apr 2024). During the last trading day the stock fluctuated **8.89%** from a day low at **\$1.80** to a day high of **\$1.96**. The price has risen in 5 of the last 10 days and is up by **2.66%** over the past 2 weeks.

The stock lies in the lower part of a wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$1.89** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **183.56%** during the next 3 months and, with a 90% probability hold a price between **\$5.36** and **\$6.18** at the end of this 3-month period.

The **Inspira Technologies Oxy B.H.N. Ltd.** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **\$2.00**. On a fall, the stock will find some support from the long-term average at approximately **\$1.85**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume gained on the last day while the price remained unchanged. This is not a classical divergence, but the stock should be watched more closely at it may be a "turning point". Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, April 11, 2024**, and so far it has fallen -8.53%. Further fall is indicated until a new bottom pivot has been found.

On the downside, the stock finds support just below today's level from accumulated volume at **\$1.64** and **\$1.62**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$1.99**, **\$2.00** and **\$2.08**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.160** between high and low, or **8.89%**. For the last week, the stock has had daily average volatility of **11.44%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Inspira Technologies Oxy B.H.N. Ltd.** stock to perform well in the short-term.

**Risk:** **Medium**

**Evaluation:** **Buy Candidate**
