## Tech commentaries:

The **Infibeam Avenues Limited** stock price fell by **-1.36%** on the last day (Tuesday, 7th May 2024) from **33.05** to **32.60**. It has now fallen 4 days in a row. During the last trading day the stock fluctuated **3.61%** from a day low at **33.05**. The price has fallen in 7 of the last 10 days and is down by **-7.12%** for this period. Volume has increased on the last day by **389 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **19 million** shares were bought and sold for approximately **625.67 million**.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **31.54** is broken, it will firstly indicate a stronger fall rate. Given the current short-term trend, the stock is expected to fall **-2.59%** during the next 3 months and, with a 90% probability hold a price between **30.72** and **38.44** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Infibeam Avenues Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **33.79** and **35.31**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Wednesday, April 03, 2024**, and so far it has fallen **-15.76%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume rose on falling prices yesterday. This may be an early warning and the stock should be followed more closely.

**Infibeam Avenues Limited** finds support from accumulated volume at **32.55** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **36.75**, **39.95** and **40.15**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **1.15** between high and low, or **3.61%**. For the last week, the stock has had daily average volatility of **2.52%**.

**Infibeam Avenues Limited** holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
