The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. On a fall, the stock will find some support from the long-term average at approximately **26.40€**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, May 15, 2024**, and so far it has fallen **-3.48%**. Further fall is indicated until a new bottom pivot has been found. **INDUS Holding AG** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

On the upside the stock meets some resistance just above today's level from accumulated volume at **27.85€**, **28.05€** and **28.70€**.
