The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, April 11, 2024**, and so far it has fallen **-3.41%**. Further fall is indicated until a new bottom pivot has been found.
