Tech commentaries:

No changes to the price of **Invesco Perpetual Select Trust PLC** stock on the last trading day (Friday, 17th May 2024). During the last trading day the stock fluctuated **0%** from a day low at **£272.00** to a day high of **£272.00**. The price has risen in 6 of the last 10 days and is up by **1.12%** over the past 2 weeks.

The stock lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **3.16%** during the next 3 months and, with a 90% probability hold a price between **£274.35** and **£291.20** at the end of this 3-month period.

The **Invesco Perpetual Select Trust PLC** stock holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the stock giving a positive forecast for the stock. On further gains, the stock will meet resistance from the short-term Moving Average at approximately **£277.14**. On a fall, the stock will find some support from the long-term average at approximately **£271.21**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. A buy signal was issued from a pivot bottom point on **Thursday, May 16, 2024**, and so far it has fallen **0%**. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Invesco Perpetual Select Trust PLC finds support from accumulated volume at **£269.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **£278.00**, **£279.00** and **£282.00**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **£0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **2.43%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **Invesco Perpetual Select Trust PLC** stock to perform well in the short-term. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Buy candidate.

Risk: **Low**

Evaluation: **Buy Candidate**
