The cryptocurrency lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to fall -5.94% during the next 3 months and, with a 90% probability hold a price between \$0.00000006 and \$0.00000017 at the end of this 3-month period.

The Jesus Coin USD cryptocurrency holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at \$0.0000010 and \$0.00000009. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on Thursday, May 02, 2024, and so far it has risen 111.50%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued.
