During the last trading day the stock fluctuated **18.91%** from a day low at **711.10** to a day high of **845.55**. The price has fallen in 7 of the last 10 days but is still up by **16.99%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **339 thousand** more shares were traded than the day before. In total, **442 thousand** shares were bought and sold for approximately **373.45** million.

The stock has broken the wide and strong rising the short-term trend up and an even stronger rate of rising is indicated. For any reaction back there will now be support on the roof on the current trend broken at **749.37**, a level that may pose a second chance to hit a runner.

The **Jindal Photo Limited** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **706.90** and **670.80**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Tuesday, June 04, 2024**, and so far it has risen 30.01%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **700.80** and **688.85**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

**Jindal Photo Limited** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Medium**

Evaluation: **Hold/Accumulate**
