Tech commentaries:

No changes to the price of **Kate Spade & Company** fund on the last trading day (Friday, 25th Aug 2017). During the last trading day the fund fluctuated **0%** from a day low at **\$18.49** to a day high of **\$18.49**. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The fund is at the lower part of a narrow and horizontal trend in the short term, and normally this may pose a good buying opportunity, though a breakdown through the bottom trend line at **\$18.48** will give a strong sell signal and a trend shift may be expected. Given the current horizontal trend, you can expect **Kate Spade & Company** fund with a 90% probability to be traded between \$18.52 and \$18.58 at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and funds seldom manage to go directly from the bottom of a trend up to the top. Funds turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Kate Spade & Company** fund holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$18.49** and **\$18.49**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, July 06, 2017**, and so far it has fallen -0.0541%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

Kate Spade & Company finds support from accumulated volume at \$18.48 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the fund meets some resistance just above today's level from accumulated volume at **\$18.50** and **\$18.51**.

In general the fund tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the fund During the last day, the fund moved **\$0** between high and low, or **0%**. For the last week the fund has had daily average volatility of **0%**

Kate Spade & Company holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
