The price has risen in 5 of the last 10 days and is up by **8.05%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **5 thousand** more shares were traded than the day before. In total, **10 thousand** shares were bought and sold for approximately **\$138.44** thousand.

The stock has broken the weak rising the short-term trend up and an even stronger rate of rising is indicated. For any reaction back there will now be support on the roof on the current trend broken at **\$14.20**, a level that may pose a second chance to hit a runner. According to fan-theory **\$15.20** will be the next possible trend-top level and thereby pose a resistance level that may not be broken at the first attempt.

Mostly positive signals in the chart today. The **Kasikornbank Public Company Ltd** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **\$14.03** and **\$13.59**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Wednesday, April 17, 2024**, and so far it has risen 10.60%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Kasikornbank Public Company Ltd** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk.

On the downside, the stock finds support just below today's level from accumulated volume at **\$13.60** and **\$13.56**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock is usually traded at a good volume, and with minor daily changes, the risk is considered to be low. During the last day, the stock moved **\$0.80 (5.81%)** between high and low. For the last week, the stock has had daily average volatility of **3.60%**.

Several short-term signals, along with a general good trend, are positive and the stock has broken the rising trend up, which indicates an even stronger rate of rising. We can conclude that the current level may hold a buying opportunity as there is a fair chance for **Kasikornbank Public Company Ltd** stock to perform well in the short-term period. Due to a possible false trend-break listing stock as pure buy candidate is held back.
