Tech commentaries:

The **Ishares Esg Msci Em Leaders Etf** ETF price gained **0.133%** on the last trading day (Wednesday, 26th Jun 2024), rising from **\$45.02** to **\$45.08**. During the last trading day the ETF fluctuated **0.200%** from a day low at **\$44.99** to a day high of **\$45.08**. The price has risen in 6 of the last 10 days and is up by **1.21%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **6 thousand** more shares were traded than the day before. In total, **7 thousand** shares were bought and sold for approximately **\$296.58** thousand.

The ETF lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the ETF is expected to rise **4.94%** during the next 3 months and, with a 90% probability hold a price between **\$46.03** and **\$50.68** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Ishares Esg Msci Em Leaders Etf** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. Higher liquidity also reduces the general risk. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Ishares Esg Msci Em Leaders Etf** ETF holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$45.16** and **\$45.55**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Friday, May 17, 2024**, and so far it has fallen **-4.77%**. Further fall is indicated until a new bottom pivot has been found.

Ishares Esg Msci Em Leaders Etf finds support from accumulated volume at **\$44.74** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$45.78**, **\$45.89** and **\$47.34**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.0900** between high and low, or **0.200%**. For the last week the ETF has had daily average volatility of **0.291%**.

The **Ishares Esg Msci Em Leaders Etf** ETF holds several negative signals and despite the positive trend, we believe **Ishares Esg Msci Em Leaders Etf** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this ETF. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this ETF since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
