During the last trading day the stock fluctuated **1.92%** from a day low at **104,200.00 Fr** to a day high of **106,200.00 Fr**. The price has risen in 6 of the last 10 days and is up by **2.51%** over the past 2 weeks. Volume fell on the last day by **-51** shares and in total, **63** shares were bought and sold for approximately **6.69 Fr** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies the upper part of a narrow and falling trend in the short term, and this may normally pose a very good selling opportunity for the short-term trader as reaction back towards the lower part of the trend can be expected. A break up at the top trend line at **106,756.53 Fr** will firstly indicate a slower falling rate, but may be the first sign of a trend shift. Given the current short-term trend, the stock is expected to fall **-6.40%** during the next 3 months and, with a 90% probability hold a price between **95,232.25 Fr** and **99,920.19 Fr** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

Mostly positive signals in the chart today. The **Chocoladefabriken Lindt & Sprüngli AG** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **106,142.86 Fr** and **105,314.29 Fr**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Monday, April 29, 2024**, and so far it has risen 3.51%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.
