The price has risen in 7 of the last 10 days and is up by **3.16%** over the past 2 weeks. Volume fell on the last day by - **22 thousand** shares and in total, **99** thousand shares were bought and sold for approximately **\$2.98** million. The stock is moving within a wide and horizontal trend and further movements within this trend can be expected. Given the current horizontal trend, you can expect **London Stock Exchange Group plc** stock with a 90% probability to be traded between **\$27.58** and **\$30.62** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

Mostly positive signals in the chart today. The **London Stock Exchange Group plc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.
