## Tech commentaries:

The **Exchange Listed Funds Trust - Lg Qraft** ETF price gained **0.290%** on the last trading day (Friday, 28th Jun 2024), rising from **\$31.00** to **\$31.09**. During the last trading day the ETF fluctuated **0.0965%** from a day low at **\$31.09** to a day high of **\$31.12**. The price has fallen in 4 of the last 10 days but is still up by **1.01%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **18** more shares were traded than the day before. In total, **3** thousand shares were bought and sold for approximately **\$78.41** thousand.

The ETF lies in the lower part of a narrow and weak rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$30.94** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the ETF is expected to rise **3.68%** during the next 3 months and, with a 90% probability hold a price between **\$32.08** and **\$32.86** at the end of this 3-month period.

The **Exchange Listed Funds Trust - Lg Qraft** ETF holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the ETF giving a positive forecast for the stock. On further gains, the ETF will meet resistance from the short-term Moving Average at approximately **\$31.12**. On a fall, the ETF will find some support from the long-term average at approximately **\$30.76**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). **Exchange Listed Funds Trust - Lg Qraft** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, June 20, 2024**, and so far it has fallen **-0.591%**. Further fall is indicated until a new bottom pivot has been found.

**Exchange Listed Funds Trust - Lg Qraft** finds support from accumulated volume at **\$31.00** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$31.14** and **\$31.27**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.0300** between high and low, or **0.0965%**. For the last week the ETF has had daily average volatility of **0.0673%**.

**Exchange Listed Funds Trust - Lg Qraft** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: **Low**

Evaluation: **Hold/Accumulate**
