## Tech commentaries:

No changes to the price of **Mediazest Plc** stock on the last trading day (Wednesday, 29th May 2024). During the last trading day the stock fluctuated **0%** from a day low at **£0.0650** to a day high of **£0.0650**. The price has fallen in 6 of the last 10 days and is down by **-35%** for this period.

The stock lies in the lower part of a very wide and weak rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **£0.0602** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **7.79%** during the next 3 months and, with a 90% probability hold a price between **£0.0649** and **£0.109** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Friday, May 24, 2024**, and so far it has fallen **0%**. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Mediazest Plc** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **£0.0707** and **£0.0657**. A break-up above any of these levels will issue buy signals. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

**Mediazest Plc** finds support from accumulated volume at **£0.0625** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **£0.0700**, **£0.0750** and **£0.0800**.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock. During the last day, the stock moved **£0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **15.69%**.

**Mediazest Plc** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. We have upgraded our analysis conclusion for this stock since the last evaluation from a Sell to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
