The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-12.45%** during the next 3 months and, with a 90% probability hold a price between **\$12.56** and **\$16.62** at the end of this 3-month period.

Mostly positive signals in the chart today. The **Ramaco Resources Inc** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. A buy signal was issued from a pivot bottom point on **Tuesday, April 23, 2024**, and so far it has risen 10.96%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely.
