## Tech commentaries:

The **Mike the Pike Productions, Inc.** stock price gained **9,900.00%** on the last trading day (Friday, 10th May 2024), rising from **\$0.000001** to **\$0.0001**. During the last trading day the stock fluctuated **0%** from a day low at **\$0.0001** to a day high of **\$0.0001**. The price has been going up and down for this period, and there has been a -50% loss for the last 2 weeks. Volume fell on the last day by **-490 thousand** shares and in total, **10 thousand** shares were bought and sold for approximately **\$1.00**. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Due to the high volatility and the trend direction we are not able to give forecast range for this stock.

There are mixed signals in the stock today. The **Mike the Pike Productions, Inc.** stock holds a buy signal from the short-term Moving Average; at the same time, however, the long-term average holds a general sell signal. Since the long-term average is above the short-term average there is a general sell signal in the stock giving a more negative forecast for the stock. On further gains, the stock will meet resistance from the long-term Moving Average at **\$0.0002**. On a fall, the stock will find some support from the short-term average at **\$0.00008586**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while the price increased. This causes a divergence and may be considered as an early warning, but it may not be. The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on **Thursday, May 09, 2024**, and so far it has risen 9,900.00%. Further rise is indicated until a new top pivot has been found.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

This stock may move very much during the day (volatility) and with periodic low trading volume this stock is considered to be "very high risk". During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **0%**.

**Mike the Pike Productions, Inc.** holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this stock. We have upgraded our analysis conclusion for this stock since the last evaluation from a Strong Sell to a Sell candidate.

**Risk:** Very High

**Evaluation:** Sell Candidate
