## Tech commentaries:

No changes to the price of **Minerco, Inc.** stock on the last trading day (Monday, 1st Jul 2024). During the last trading day the stock fluctuated 0% from a day low at \$0.000001 to a day high of \$0.000001. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at -\$0.00000915 is broken, it will firstly indicate a stronger fall rate. Due to the high volatility and the trend direction we are not able to give forecast range for this stock.

A buy signal was issued from a pivot bottom point on **Monday, April 15, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved \$0 between high and low, or 0%. For the last week the stock has had daily average volatility of 0%

**Minerco, Inc.** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
