There are mixed signals in the stock today. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued. A buy signal was issued from a pivot bottom point on **Thursday, June 20, 2024**, and so far it has fallen 0%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD).

**Marsden Maritime Holdings Limited** finds support from accumulated volume at \$3.44 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested.
