## Tech commentaries:

No changes to the price of **MongBNB USD** stock on the last trading day (Friday, 28th Jun 2024). During the last trading day the stock fluctuated 0% from a day low at \$0.00000000 to a day high of \$0.00000000. The price has been going up and down for this period, and there has been a 0% change for the last 2 weeks.

The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise 8.83% during the next 3 months and, with a 90% probability hold a price between \$0.00000000 and \$0.00000000 at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **MongBNB USD** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at \$0.00000000 and \$0.00000000. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, June 27, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

**MongBNB USD** finds support from accumulated volume at \$0.00000000 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at \$0.00000000, \$0.00000000 and \$0.00000000.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved \$0 between high and low, or 0%. For the last week the stock has had daily average volatility of 0%

**MongBNB USD** holds several negative signals and this should be a sell candidate, but due to the general chance for a turnaround situation it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.
