Tech commentaries:

The **DOC.COM USD** cryptocurrency price fell by **-13.36%** on the last day (Tuesday, 2nd Jul 2024) from **\$0.0290** to **\$0.0251**. During the last trading day the cryptocurrency fluctuated **7.34%** from a day low at **\$0.0251** to a day high of **\$0.0269**. The price has fallen in 6 of the last 10 days and is down by **-16.57%** for this period. Volume fell on the last day along with the cryptocurrency, which is actually a good sign as volume should follow the cryptocurrency. On the last day, the trading volume fell by **-47 thousand** shares and in total, **794 thousand** shares were bought and sold for approximately **\$19.92 thousand**.

The cryptocurrency lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the cryptocurrency is expected to rise **105.25%** during the next 3 months and, with a 90% probability hold a price between **\$0.0432** and **\$0.0768** at the end of this 3-month period.

The **DOC.COM USD** cryptocurrency holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the cryptocurrency giving a positive forecast for the stock. On further gains, the cryptocurrency will meet resistance from the short-term Moving Average at approximately **\$0.0311**. On a fall, the cryptocurrency will find some support from the long-term average at approximately **\$0.0235**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Thursday, June 20, 2024**, and so far it has fallen **-28.05%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this cryptocurrency may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

On the downside, the cryptocurrency finds support just below today's level from accumulated volume at **\$0.0221** and **\$0.0215**. On the upside the cryptocurrency meets some resistance just above today's level from accumulated volume at **\$0.0261**, **\$0.0290** and **\$0.0301**.

This cryptocurrency may move very much during the day (volatility) and with periodic low trading volume this cryptocurrency is considered to be "very high risk". During the last day, the cryptocurrency moved **\$0.0018** between high and low, or **7.34%**. For the last week the cryptocurrency has had daily average volatility of **5.29%**.

Several short-term signals, along with a general good trend, are positive and we conclude that the current level may hold a buying opportunity as there is a fair chance for **DOC.COM USD** cryptocurrency to perform well in the short-term.

Risk: Very High

Evaluation: Buy Candidate
