Volume fell on the last day by **-240 thousand** shares and in total, **433 thousand** shares were bought and sold for approximately **\$23.76** million. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **16.02%** during the next 3 months and, with a 90% probability hold a price between **\$61.68** and **\$65.14** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day despite gaining prices. This causes a divergence between volume and price and it may be an early warning. The stock should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Wednesday, April 24, 2024**, and so far it has fallen -0.724%. Further fall is indicated until a new bottom pivot has been found.
