Volume fell on the last day by **-13 thousand** shares and in total, **39** thousand shares were bought and sold for approximately **\$659.52** thousand. You should take into consideration that falling volume on higher prices causes divergence and may be an early warning about possible changes over the next couple of days.

The stock lies in the middle of a wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **11.68%** during the next 3 months and, with a 90% probability hold a price between **\$17.98** and **\$21.08** at the end of this 3-month period.

There are few to no technical positive signals at the moment. On further gains, the stock will meet resistance from the long-term Moving Average at **\$17.01**. On a fall, the stock will find some support from the short-term average at **\$16.33**. A break-up through the long-term average will give another buy signal, while a fall below the short-term average will add another sell signal and strengthen the general signal.
