No changes to the price of **Northern Star Investment Corp. II** stock on the last trading day (Friday, 26th Apr 2024). During the last trading day the stock fluctuated **0%** from a day low at **\$0.0350** to a day high of **\$0.0350**. The price has risen in 5 of the last 10 days but is still down by **-30%** for this period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Northern Star Investment Corp. II** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.0401** and **\$2.78**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, April 25, 2024**, and so far it has fallen 0%. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point". The very low volume increases the risk and reduces the other technical signals issued.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **\$0** between high and low, or **0%**. For the last week the stock has had daily average volatility of **44.90%**

Evaluation: Hold/Accumulate
