Tech commentaries:

The **Tidal Etf Trust Ii Yieldmax Nvd** ETF price gained **0.137%** on the last trading day (Friday, 28th Jun 2024), rising from **\$29.27** to **\$29.31**. During the last trading day the ETF fluctuated **3.08%** from a day low at **\$29.11** to a day high of **\$30.01**. The price has risen in 6 of the last 10 days but is still down by **-3.14%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **127 thousand** more shares were traded than the day before. In total, **1** million shares were bought and sold for approximately **\$37.70** million.

The ETF lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the ETF is expected to rise **2.75%** during the next 3 months and, with a 90% probability hold a price between **\$28.73** and **\$32.68** at the end of this 3-month period.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Tidal Etf Trust Ii Yieldmax Nvd** ETF holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$29.42** and **\$29.53**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Wednesday, June 26, 2024**, and so far it has fallen **-1.41%**. Further fall is indicated until a new bottom pivot has been found.

Tidal Etf Trust Ii Yieldmax Nvd finds support from accumulated volume at **\$28.82** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$29.59**, **\$30.52** and **\$30.54**.

This ETF has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the ETF moved **\$0.90** between high and low, or **3.08%**. For the last week, the ETF has had daily average volatility of **4.03%**.

The Tidal Etf Trust Ii Yieldmax Nvd ETF holds several negative signals and despite the positive trend, we believe **Tidal Etf Trust Ii Yieldmax Nvd** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this ETF. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this ETF since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
