The price has been going up and down for this period, and there has been a **-2.03%** loss for the last 2 weeks. The stock lies in the middle of a wide and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **6.30%** during the next 3 months and, with a 90% probability hold a price between **\$24.36** and **\$27.50** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Orion Engineered Carbons SA** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. A sell signal was issued from a pivot top point on **Tuesday, April 09, 2024**, and so far it has fallen **-7.16%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Orion Engineered Carbons SA finds support from accumulated volume at **\$23.53** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$24.00**, **\$24.24** and **\$25.42**.

The Orion Engineered Carbons SA stock holds several negative signals and despite the positive trend, we believe **Orion Engineered Carbons SA** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Strong Buy to a Sell candidate.
