Tech commentaries:

The **Odyssey Marine Exploration** stock price fell by **-2.97%** on the last day (Tuesday, 2nd Jul 2024) from **\$4.71** to **\$4.57**. It has now fallen 4 days in a row. During the last trading day the stock fluctuated **3.62%** from a day low at **\$4.56** to a day high of **\$4.73**. The price has fallen in 8 of the last 10 days and is down by **-13.45%** for this period. Volume has increased on the last day by **56 thousand** shares but on falling prices. This may be an early warning and the risk will be increased slightly over the next couple of days. In total, **156 thousand** shares were bought and sold for approximately **\$711.35 thousand**.

Given the current short-term trend, the stock is expected to rise **40.79%** during the next 3 months and, with a 90% probability hold a price between **\$6.43** and **\$8.20** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Odyssey Marine Exploration** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$4.88** and **\$4.73**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, June 13, 2024**, and so far it has fallen **-16.83%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). **Odyssey Marine Exploration** gained volume on the last day, but on falling prices. In technical terms, this is called divergence and may be an early warning. In some cases, increasing volume on falling prices may be considered positive, but that is mainly in typical "sell-offs".

On the downside, the stock finds support just below today's level from accumulated volume at **\$4.09** and **\$3.79**. On the upside the stock meets some resistance just above today's level from accumulated volume at **\$4.67**, **\$4.95** and **\$5.05**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.165** between high and low, or **3.62%**. For the last week, the stock has had daily average volatility of **4.53%**.

The Odyssey Marine Exploration stock holds several negative signals and despite the positive trend, we believe **Odyssey Marine Exploration** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
