## **Tech commentaries:**

The Oscar Properties Holding AB (publ) stock price fell by -0.622% on the last day (Friday, 17th May 2024) from kr0.0804 to kr0.0799. It has now fallen 10 days in a row. During the last trading day the stock fluctuated 16.71% from a day low at kr0.0760 to a day high of kr0.0887. The price has fallen in 10 of the last 10 days and is down by -71% for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by -3 million shares and in total, 9 million shares were bought and sold for approximately kr727.28 thousand.

The stock lies in the lower of a very wide and falling trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at -kr0.0312 is broken, it will firstly indicate a stronger fall rate. Due to the high volatility and the trend direction we are not able to give forecast range for this stock.

Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The Oscar Properties Holding AB (publ) stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at kr0.111 and kr0.382. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on Wednesday, March 13, 2024, and so far it has fallen -92.60%. Further fall is indicated until a new bottom pivot has been found. Volume fell along with the price during the last trading day, which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk.

There is no support from accumulated volume below today's level and given the right condition the stock may perform very badly in the next couple of days. On the upside the stock meets some resistance just above today's level from accumulated volume at kr0.0804, kr0.0887 and kr0.0900.

This stock may move very much during the day (volatility) and with periodic low trading volume this stock is considered to be "very high risk". During the last day, the stock moved kr0.0127 between high and low, or 16.71%. For the last week the stock has had daily average volatility of 42.18%.

Oscar Properties Holding AB (publ) holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: Very High

**Evaluation: Strong Sell Candidate**
