Tech commentaries:

No changes to the price of **Pantheon Resources** stock on the last trading day (Wednesday, 2nd Sep 2020). During the last trading day the stock fluctuated **4.17%** from a day low at **£0.240** to a day high of **£0.250**. The price has risen in 4 of the last 10 days and is up by **71.43%** over the past 2 weeks.

The stock lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **7.02%** during the next 3 months and, with a 90% probability hold a price between **£0.248** and **£0.261** at the end of this 3-month period.

The **Pantheon Resources** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock. Also, there is a general buy signal from the relation between the two signals where the short-term average is above the long-term average. On corrections down, there will be some support from the lines at **£0.211** and **£0.173**. A breakdown below any of these levels will issue sell signals. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, November 30, -1**. Further fall is indicated until a new bottom pivot has been found. Volume fell on the last day without any changes to the price. This does not cause any direct divergence but may be an early warning and a possible "turning point".

Pantheon Resources finds support from accumulated volume at £0.230 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.

In general the stock tends to have very controlled movements and therefore the general risk is considered very low. However, be aware of low or falling volume and make sure to keep an eye on the stock During the last day, the stock moved **£0.0100** between high and low, or **4.17%**. For the last week the stock has had daily average volatility of **3.48%**

Pantheon Resources holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development.

Risk: Low

Evaluation: Hold/Accumulate
