Tech commentaries:

The **PhoenixDAO USD** stock price fell by **-1.60%** on the last day (Friday, 28th Jun 2024) from **\$0.0001** to **\$0.0001**. During the last trading day the stock fluctuated **3.25%** from a day low at **\$0.0001** to a day high of **\$0.0001**. The price has fallen in 4 of the last 10 days and is down by **-6.82%** for this period.

The stock lies in the middle of a very wide and falling trend in the short term and further fall within the trend is signaled. Due to the high volatility and the trend direction we are not able to give forecast range for this stock.

There are few to no technical positive signals at the moment. The **PhoenixDAO USD** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$0.0001** and **\$0.0001**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Thursday, April 11, 2024**, and so far it has fallen **-84.74%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell along with the price during the last trading day which is technical positive. One should, however, note that this stock may have low liquidity in periods, which increases the general risk. The very low volume increases the risk and reduces the other technical signals issued.

PhoenixDAO USD finds support from accumulated volume at **\$0.0001** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$0.0001**, **\$0.0001** and **\$0.0001**.

This stock has average movements during the day, but be aware of low or falling volume as this increases the risk. During the last day, the stock moved **\$0.000004** between high and low, or **3.25%**. For the last week the stock has had daily average volatility of **3.59%**.

PhoenixDAO USD holds several negative signals and is within a very wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
