## Tech commentaries:

The **Playa Hotels & Resorts N.V.** stock price fell by **-0.98%** on the last day (Friday, 26th Apr 2024) from **\$9.14** to **\$9.05**. It has now fallen 3 days in a row. During the last trading day the stock fluctuated **1.33%** from a day low at **\$9.05** to a day high of **\$9.17**. The price has fallen in 8 of the last 10 days and is down by **-2.27%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-99 thousand** shares and in total, **192 thousand** shares were bought and sold for approximately **\$1.74 million**.

The stock lies in the lower part of a wide and strong rising trend in the short term, and this may normally pose a very good buying opportunity. If the lower trend floor at **\$8.96** is broken, it will firstly indicate a slower rate of rising, but may also be an early warning for a trend shift. Given the current short-term trend, the stock is expected to rise **10.06%** during the next 3 months and, with a 90% probability hold a price between **\$9.86** and **\$11.07** at the end of this 3-month period.

A buy signal was issued from a pivot bottom point on **Thursday, April 18, 2024**, and so far it has risen 2.03%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Playa Hotels & Resorts N.V.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **\$9.05** and **\$9.41**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

**Playa Hotels & Resorts N.V.** finds support from accumulated volume at **\$8.83** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$9.54**, **\$9.56** and **\$9.65**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **\$0.120** between high and low, or **1.33%**. For the last week, the stock has had daily average volatility of **1.93%**.

The **Playa Hotels & Resorts N.V.** stock holds several negative signals and despite the positive trend, we believe **Playa Hotels & Resorts N.V.** will perform weakly in the next couple of days or weeks. Therefore, we hold a negative evaluation of this stock.

Risk: **Medium**

Evaluation: **Sell Candidate**
