Tech commentaries:

The **Precision Camshafts Limited** stock price fell by **-3.00%** on the last day (Monday, 6th May 2024) from **208.00** to **201.75**. During the last trading day the stock fluctuated **4.02%** from a day low at **200.05** to a day high of **208.10**. The price has fallen in 5 of the last 10 days and is down by **-4.43%** for this period. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. On the last day, the trading volume fell by **-53 thousand** shares and in total, **65 thousand** shares were bought and sold for approximately **13.07** million.

The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-6.08%** during the next 3 months and, with a 90% probability hold a price between **164.41** and **204.89** at the end of this 3-month period.

There are few to no technical positive signals at the moment. The **Precision Camshafts Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **209.16** and **207.62**. A break-up above any of these levels will issue buy signals. A sell signal was issued from a pivot top point on **Tuesday, April 02, 2024**, and so far it has fallen **-9.79%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

Precision Camshafts Limited finds support from accumulated volume at **200.60** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **222.25**, **223.65** and **235.70**.

In general the stock tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the stock moved **8.05** between high and low, or **4.02%**. For the last week the stock has had daily average volatility of **2.93%**.

Precision Camshafts Limited holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Low**

Evaluation: **Sell Candidate**
