The price has been going up and down for this period, and there has been a **-1.59%** loss for the last 2 weeks. Volume fell on the last day along with the stock, which is actually a good sign as volume should follow the stock. The stock lies in the middle of a wide and falling trend in the short term and further fall within the trend is signaled. Given the current short-term trend, the stock is expected to fall **-16.60%** during the next 3 months and, with a 90% probability hold a price between **\$13.78** and **\$16.75** at the end of this 3-month period. Do note, that if the stock price manages to stay at current levels or higher, our prediction target will start to change positively over the next few days as the conditions for the current predictions will be broken.

A buy signal was issued from a pivot bottom point on **Tuesday, April 16, 2024**, and so far it has risen 1.58%. Further rise is indicated until a new top pivot has been found. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Privia Health Group, Inc.** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. On corrections up, there will be some resistance from the lines at **\$18.62** and **\$18.55**. A break-up above any of these levels will issue buy signals. Volume fell together with the price during the last trading day and this reduces the overall risk as volume should follow the price movements.

**Privia Health Group, Inc.** finds support from accumulated volume at **\$17.85** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance from accumulated volume at **\$21.88**, **\$21.95** and **\$22.32**.
