During the last trading day the stock fluctuated **0.372%** from a day low at **\$0.0269** to a day high of **\$0.0270**. The price has fallen in 4 of the last 10 days and is down by **-10%** for this period. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **266 thousand** more shares were traded than the day before. The stock lies in the middle of a very wide and strong rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the stock is expected to rise **114.45%** during the next 3 months and, with a 90% probability hold a price between **\$0.0277** and **\$0.0704** at the end of this 3-month period.

The **Pershing Resources Company, Inc.** stock holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the stock has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$0.0219** and **\$0.0228**. A breakdown below any of these levels will issue sell signals. A buy signal was issued from a pivot bottom point on **Friday, June 14, 2024**, and so far it has risen 62.65%. Further rise is indicated until a new top pivot has been found. **Pershing Resources Company, Inc.** has increased volume and follows the last lift in the price. This is considered to be a technical positive sign as volume should follow the price-formation. The very low volume increases the risk and reduces the other technical signals issued. Some negative signals were issued as well, and these may have some influence on the near short-term development. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

On the downside, the stock finds support just below today's level from accumulated volume at **\$0.0225** and **\$0.0224**. On the upside the stock meets some resistance from accumulated volume at **\$0.0290**, **\$0.0299** and **\$0.0300**.

This stock may move very much during the day (volatility) and with a very large prediction interval from the Bollinger Band this stock is considered to be "very high risk". During the last day, the stock moved **\$0.0001** between high and low, or **0.372%**. For the last week, the stock has had daily average volatility of **8.65%**.

Pershing Resources Company, Inc. holds several positive signals and is within a strong rising trend. As the old saying says, "Let the trend be your friend.". We therefore consider it to be a good choice at these current levels and we are expecting further gains during the next 3 months. We have upgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Strong Buy candidate.

Risk: Very High

Evaluation: Strong Buy Candidate
