A buy signal was issued from a pivot bottom point on **Wednesday, May 22, 2024**, and so far it has risen 21.65%. Further rise is indicated until a new top pivot has been found. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. On the downside, the stock finds support just below today's level from accumulated volume at **\$16.83** and **\$16.70**. There is no resistance from accumulated volume above today's level and given the right condition the stock may perform very well during the next couple of days.
