## Tech commentaries:

The **Cohen & Steers Tax-advantaged Preferred** trust price gained **1.13%** on the last trading day (Thursday, 27th Jun 2024), rising from **\$19.39** to **\$19.61**. During the last trading day the trust fluctuated **1.71%** from a day low at **\$19.28** to a day high of **\$19.61**. The price has fallen in 6 of the last 10 days but is still up by **0.15%** over the past 2 weeks. Volume has increased on the last day along with the price, which is a positive technical sign, and, in total, **29 thousand** more shares were traded than the day before. In total, **111 thousand** shares were bought and sold for approximately **\$2.18** million.

The trust lies in the middle of a weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the trust is expected to rise **3.73%** during the next 3 months and, with a 90% probability hold a price between **\$19.57** and **\$20.65** at the end of this 3-month period.

The **Cohen & Steers Tax-advantaged Preferred** trust holds buy signals from both short and long-term Moving Averages giving a positive forecast for the stock, but the trust has a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections down, there will be some support from the lines at **\$19.34** and **\$19.41**. A breakdown below any of these levels will issue sell signals. Volume is rising along with the price. This is considered to be a good technical signal. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Tuesday, May 21, 2024**, and so far it has fallen **-0.0510%**. Further fall is indicated until a new bottom pivot has been found. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD).

**Cohen & Steers Tax-advantaged Preferred** finds support from accumulated volume at **\$19.40** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the trust meets some resistance just above today's level from accumulated volume at **\$19.62** and **\$19.73**.

In general the trust tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the trust moved **\$0.330** between high and low, or **1.71%**. For the last week the trust has had daily average volatility of **1.06%**.

**Cohen & Steers Tax-advantaged Preferred** holds several negative signals and we believe that it will still perform weakly in the next couple of days or weeks. We, therefore, hold a negative evaluation of this trust.

Risk: **Low**

Evaluation: **Sell Candidate**
