## Tech commentaries:

No changes to the price of **WISDOMTREE CBOE S&P 500 PUTWRITE** ETF on the last trading day (Friday, 28th Jun 2024). During the last trading day the ETF fluctuated **0.419%** from a day low at **\$33.35** to a day high of **\$33.49**. The price has risen in 6 of the last 10 days but is still down by **-0.43%** for this period.

The ETF lies in the middle of a narrow and weak rising trend in the short term and a further rise within the trend is signaled. Given the current short-term trend, the ETF is expected to rise **3.02%** during the next 3 months and, with a 90% probability hold a price between **\$33.45** and **\$34.76** at the end of this 3-month period.

The **WISDOMTREE CBOE S&P 500 PUTWRITE** ETF holds a sell signal from the short-term Moving Average; at the same time, however, there is a buy signal from the long-term average. Since the short-term average is above the long-term average there is a general buy signal in the ETF giving a positive forecast for the stock. On further gains, the ETF will meet resistance from the short-term Moving Average at approximately **\$33.47**. On a fall, the ETF will find some support from the long-term average at approximately **\$33.21**. A break-up through the short-term average will send a buy signal, whereas a breakdown through the long-term average will send a sell signal. Furthermore, there is a buy signal from the 3 month Moving Average Convergence Divergence (MACD). The volume rose on the last day while price remained unchanged. This may be an early warning and the ETF should be watched closely. Some negative signals were issued as well, and these may have some influence on the near short-term development. A sell signal was issued from a pivot top point on **Friday, June 21, 2024**, and so far it has fallen - 0.89%. Further fall is indicated until a new bottom pivot has been found.

**WISDOMTREE CBOE S&P 500 PUTWRITE** finds support from accumulated volume at \$33.30 and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the ETF meets some resistance just above today's level from accumulated volume at **\$33.47**, **\$33.49** and **\$33.52**.

In general the ETF tends to have very controlled movements and with good liquidity the risk is considered very low in this stock. During the last day, the ETF moved **\$0.140** between high and low, or **0.419%**. For the last week the ETF has had daily average volatility of **0.624%**.

**WISDOMTREE CBOE S&P 500 PUTWRITE** holds several positive signals, but we still don't find these to be enough for a buy candidate. At the current level, it should be considered as a hold candidate (hold or accumulate) in this position whilst awaiting further development. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this ETF since the last evaluation from a Buy to a Hold/Accumulate candidate.

Risk: **Low**

Evaluation: **Hold/Accumulate**
