Volume: Sell  
MACD: Sell

## Tech commentaries:

No changes to the price of **Quality Houses Public Company Limited** stock on the last trading day (Friday, 17th May 2024). During the last trading day the stock fluctuated **1.96%** from a day low at **2.04** to a day high of **2.08**. The price has fallen in 4 of the last 10 days and is down by **-5.5%** for this period.

The stock is at the lower part of a wide and horizontal trend in the short term, and normally this may pose a good buying opportunity, though a breakdown through the bottom trend line at **2.04** will give a strong sell signal and a trend shift may be expected. Given the current horizontal trend, you can expect **Quality Houses Public Company Limited** stock with a 90% probability to be traded between **2.01** and **2.26** at the end of this 3-month period. A break of a horizontal trend is often followed by a large increase in the volume, and stocks seldom manage to go directly from the bottom of a trend up to the top. Stocks turning up in the middle of a horizontal trend are therefore considered to be potential runners.

A buy signal was issued from a pivot bottom point on **Wednesday, May 15, 2024**, and so far it has risen 0.98%. Further rise is indicated until a new top pivot has been found. Some negative signals were issued as well, and these may have some influence on the near short-term development. The **Quality Houses Public Company Limited** stock holds sell signals from both short and long-term Moving Averages giving a more negative forecast for the stock. Also, there is a general sell signal from the relation between the two signals where the long-term average is above the short-term average. On corrections up, there will be some resistance from the lines at **2.10** and **2.19**. A break-up above any of these levels will issue buy signals. Furthermore, there is currently a sell signal from the 3 month Moving Average Convergence Divergence (MACD). Volume fell during the last trading day while price remained unchanged. This may be an early warning, but it may also not. We still recommend that you pay attention over the next couple of days.

**Quality Houses Public Company Limited** finds support from accumulated volume at **2.04** and this level may hold a buying opportunity as an upwards reaction can be expected when the support is being tested. On the upside the stock meets some resistance just above today's level from accumulated volume at **2.16**, **2.18** and **2.20**.

This stock has average movements during the day and with good trading volume, the risk is considered to be medium. During the last day, the stock moved **0.0400** between high and low, or **1.96%**. For the last week, the stock has had daily average volatility of **2.54%**.

**Quality Houses Public Company Limited** holds several negative signals and is within a wide and falling trend, so we believe it will still perform weakly in the next couple of days or weeks. We therefore hold a negative evaluation of this stock. Due to some small weaknesses in the technical picture we have downgraded our analysis conclusion for this stock since the last evaluation from a Hold/Accumulate to a Sell candidate.

Risk: **Medium**

Evaluation: **Sell Candidate**
